

Complete Projection Pipeline: Tangent Plane → Sphere → ERP

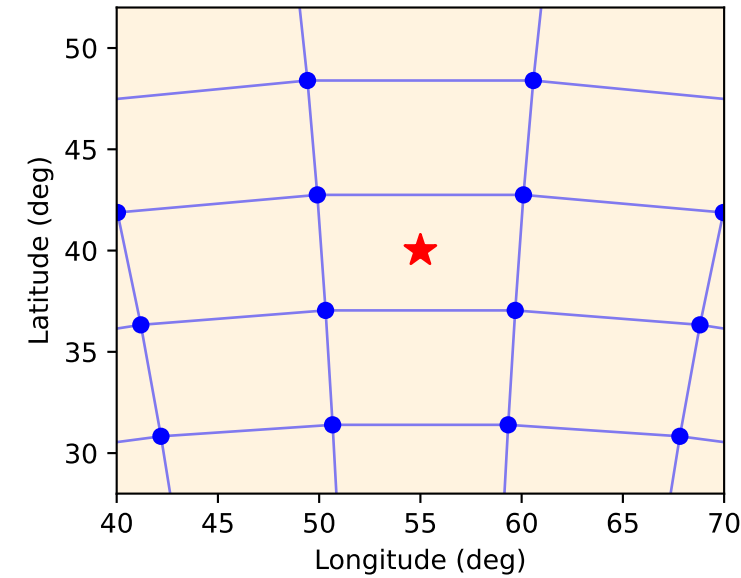

Step 1: Tangent Plane
(u, v) coordinates
Uniform grid

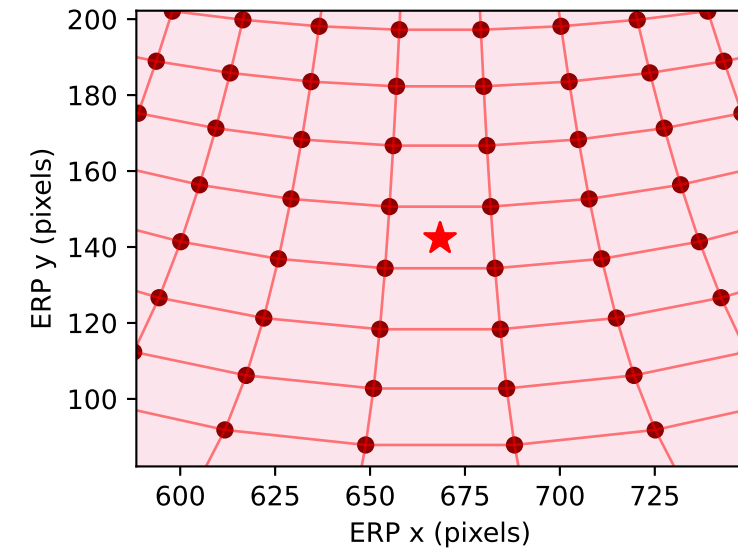

Step 2: Project to Sphere
 $(x, y, z) = p/||p||$
Curved grid

Step 3: Geographic coords
Center: (55°, 40°)
Still curved

Step 4: ERP Image
Pixel coordinates
Stretched!

Multiple BFOVs on ERP Image: Colored points show tangent plane sampling coverage
High-latitude regions are stretched horizontally; tangent plane sampling avoids this distortion
